

HISTORY AND FUTURE GEONODE

ARIEL NÚÑEZ

@INGENIEROARIEL - TERRANODO LLC

- Born and live in Barranquilla, Colombia's caribbean coast.
- Husband: @cristinao
- Father of 3 daughters: Elena, Amelie and Maura.
- Electronic Engineer doing a Masters on Computer Vision
- Worked for the World Bank on Open Source and Open Data for 6 years.
- Cofounder of Terranodo LLC with Jeff Johnson (@ortelius) and Angelos Tzotsos (@kalxas)

OUR HISTORY

GABRIEL GARCÍA MÁRQUEZ
1927 - 2014

REALISMO MÁGICO

2009

“

HOW CAN WE GUARANTEE
THERE IS DATA BEHIND
METADATA?

— *Chris Holmes and Stuart Gill (then OpenGeo and World Bank)*

”

A STATIC JAVASCRIPT CLIENT HITTING A VANILLA GEOSERVER

2010

“
IT SHOULD BE EASY TO
INSTALL GEONODE AND
UPLOAD DATA

— *David Winslow (then OpenGeo)*

”

AN STATIC CLIENT WITH A DJANGO APP
CONNECTED TO A GEOSERVER AND
GEONETWORK WITH **PROGRAMMATIC**
UPLOADS AND A DEBIAN INSTALLER

2011

“

WE SHOULD ALWAYS BE
ABLE TO DOWNLOAD DATA

— *Ariel Núñez (then World Bank)*

”

AN STATIC CLIENT CONNECTED TO A
DJANGO APP CONNECTED TO GEOSERVER
AND GEONETWORK WITH AN
INTEGRATION TEST SUITE AND DEBIAN

2012

“

GEONODE NEEDS GREAT MANUALS

— *Jeff Johnson (then OpenGeo)*

”

AN STATIC CLIENT CONNECTED TO A
DJANGO APP CONNECTED TO
GEOSERVER AND GEONETWORK WITH
AN INTEGRATION TEST SUITE, DEBIAN
INSTALLERS AND **ONLINE DOCS +
WEBSITE**

2013

“

GEONODE SHOULD BE
MORE SOCIAL AND ALLOW
BEAUTIFUL PDF UPLOAD

— *Simone Dalmasso (then ITHACA and WFP)*

”

AN STATIC CLIENT CONNECTED
DJANGO APP WITH SUPPORT FOR
**USERS, ADVANCED
PERMISSIONS, GROUPS,
DOCUMENT UPLOAD CONNECTED
TO GEOSERVER AND GEONETWORK**

2014

“

METADATA SHOULD HAVE A
SINGLE SOURCE OF TRUTH

— *Tom Kralidis, Meteorological Service of Canada*

”

AN STATIC CLIENT CONNECTED TO
A DJANGO APP WITH A **CSW**
INTERFACE BACKED BY A CUSTOM
GEOSERVER

2015

“

GEONODE SHOULD BE
BEAUTIFUL AND USABLE

— *Paolo Pasquali, ITHACA*

”

AN STATIC CLIENT CONNECTED TO
A **BEAUTIFUL** DJANGO SITE
BACKED BY A CUSTOM GEOSERVER

2016

“
GEONODE SHOULD
INTEGRATE BETTER WITH
GEOSERVER

— *Alessio Fabiani, GeoSolutions*

”

**A STATIC CLIENT CONNECTED TO A
CSW ENABLED DJANGO APP
BACKED BY A VANILLA GEOSERVER
WITH PLUGGABLE EXTENSIONS**

2017

“
A PRODUCTION GRADE
GEONODE SHOULD BE
ONLY ONE CLICK AWAY

— *Francesco Bartoli, GeoBeyond*

”

AN STATIC CLIENT CONNECTED TO
A DJANGO APP BACKED BY
GEOSERVER ALL RUNNING IN
DOCKER

2018

“

GEONODE SHOULD HAVE A
ROBUST API

— *Patrick Dufour (former US Dept of State, WFP)*

”

GEONODE 3.0

API FIRST

A.K.A. SWAGGER

OPENAPI 3.0

2019

“

I HAVE AN IDEA

— *Person sitting in this room*

”

**MULTIPLE STATIC CLIENTS ON EXTJS,
OPENLAYERS, LEAFLET,
ANGULARJS, REACT, VUE, D3,
MAPBOXGL CONNECTED TO A
DJANGO APP BACKED BY GEOSERVER,
QGIS, MAPSERVER, ARCGIS.**

**EVERYTHING IS
DIFFERENT**

EVERYTHING IS COMPATIBLE

OGC CSW

OGC WFS

OGC WMS

OGC WCS

EVERYTHING IS A
GEONODE

THE FRAMEWORK
WHAT IS
GEONODE?

**GEONODE IS A FRAMEWORK
TO BUILD WEBSITES THAT
SHARE GEOSPATIAL DATA**

THE SITE

WHAT IS A
GEONODE?

**A GEONODE IS A DATA
REPOSITORY THAT PROVIDES AN
AUTOMATIC STANDARDS
COMPLIANT API FOR YOUR DATA**

**WILL MY GEONODE BE
ABLE TO PULL DATA FROM
YOUR GEONODE?**

YES

HOW DO
WE DO IT?

END

VIVIEN ASKED
FOR A SHORT
PRESENTATION

HOW DO
WE DO IT?

**WE NEED TO AGREE ON A
DEFINITION OF 'CORE' GEONODE
AND MAKE EVERYTHING ELSE
OPTIONAL.**

SHOULD WE BE ABLE TO
HAVE GEONODE THAT IS
NOT IN PYTHON?

IF THE API IS SIMPLE
ENOUGH, WHY NOT?

SHOULD WE BE ABLE TO HAVE A
FULLY STATIC GEONODE THAT CAN
BE DEPLOYED ON AMAZON S3?

NO, THAT WOULD BE
TOO HARD. WINK. WINK.

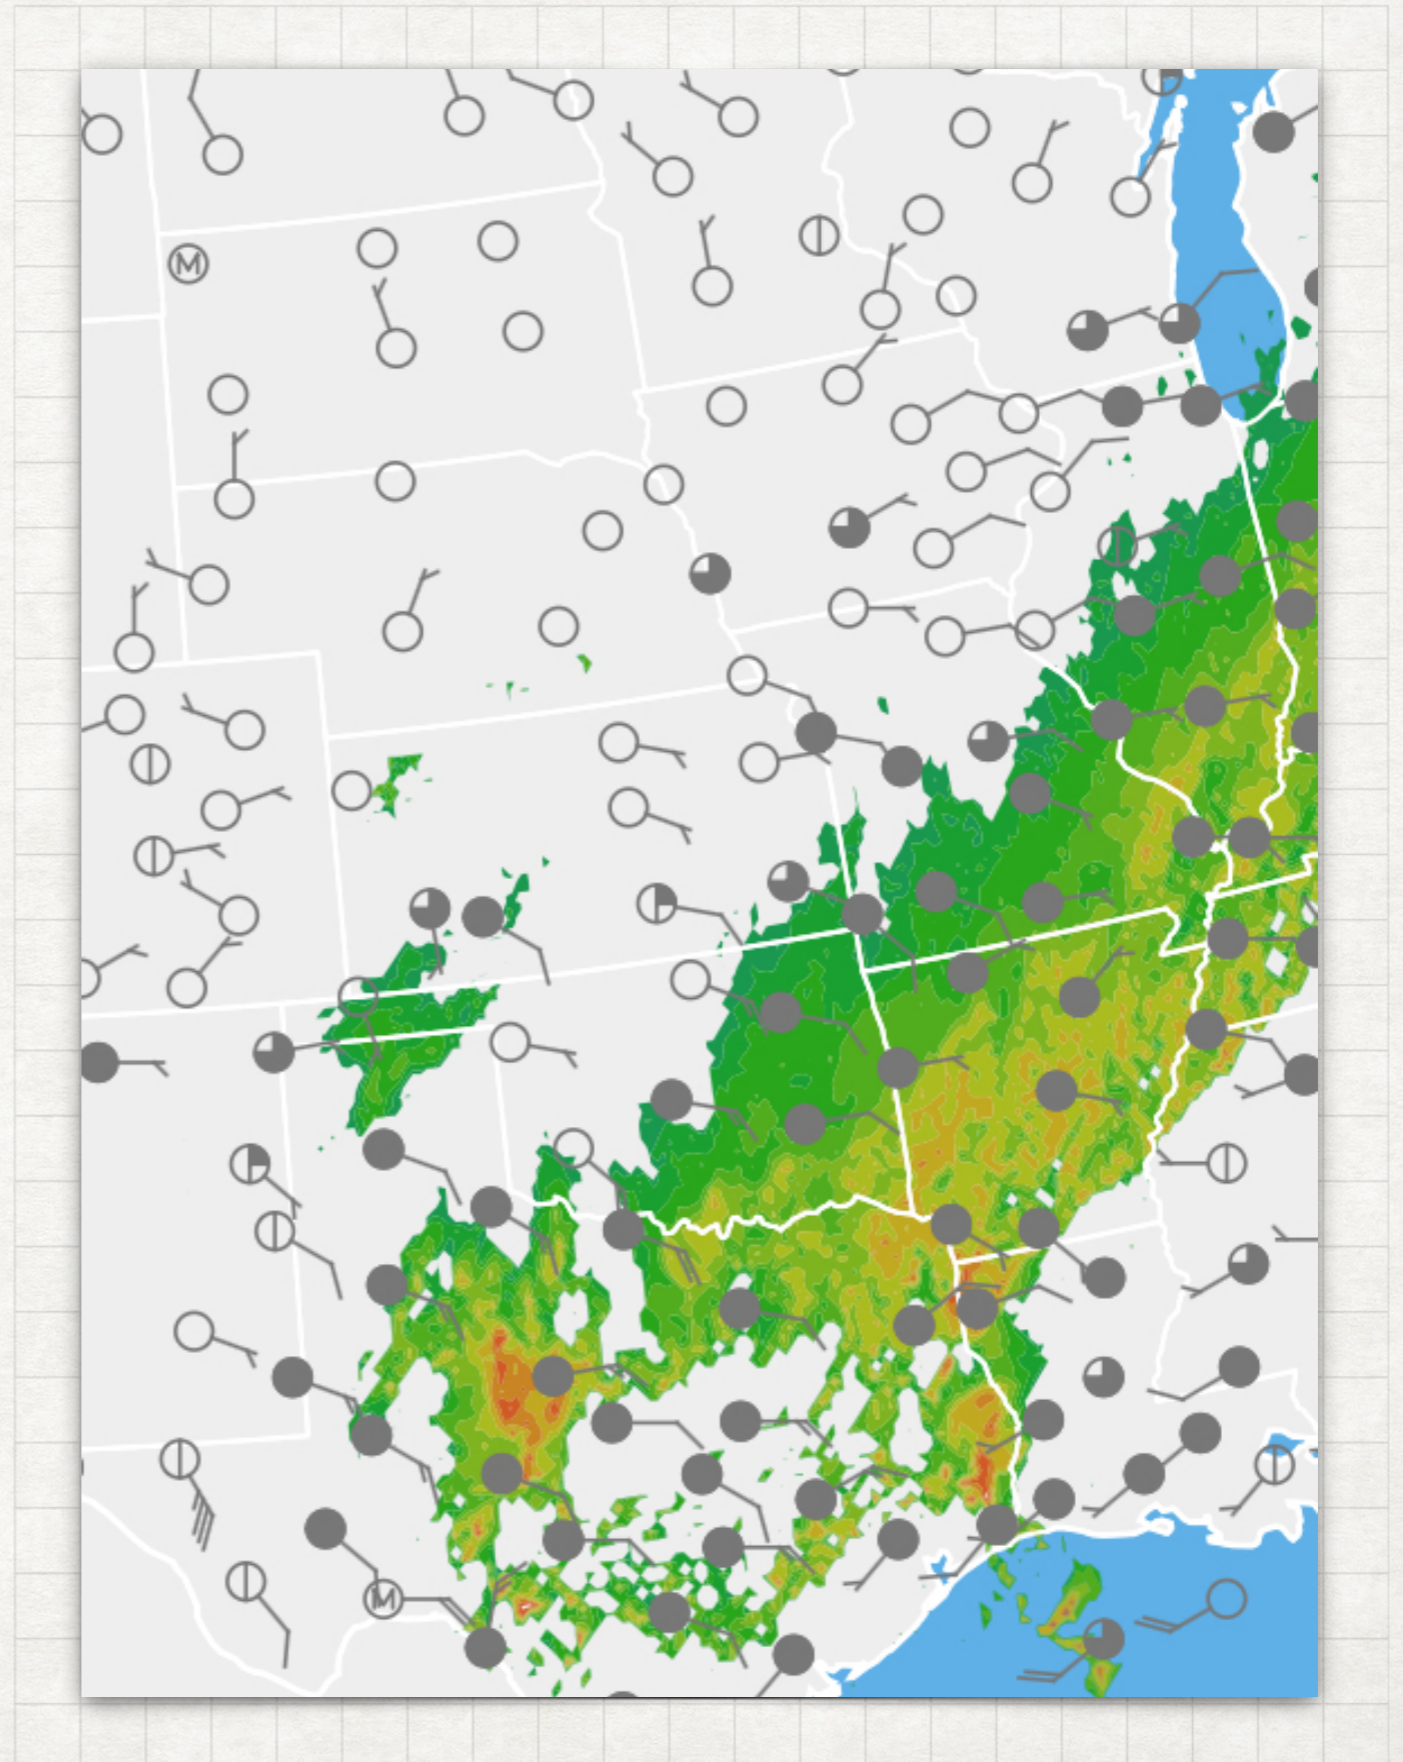

THIS TIME FOR REAL
END

MY DREAM
GEONODE

**EASY TO CREATE A
CUSTOM MAP FOR A
DATASET**

FOR EXAMPLE,
SOMETHING LIKE THIS:

SVG CUSTOM DRAWING

**POSSIBLE TO INSTALL A GEONODE
FOR FREE ON AN HTTPS ENABLED
DOMAIN IN SECONDS**

**THEN COME BACK A
YEAR LATER AND SEE IT
CONTINUE TO WORK**

**POSSIBILITY TO CREATE
MAPS FROM A MOBILE
DEVICE**

**SMALL CORE WITH
CATALOG, VECTOR AND
RASTER DATA ACCESS**

**POSSIBILITY TO ADD LINKS TO
WIKIDATA ITEMS AT THE FEATURE
LEVEL AND AT THE METADATA
LEVEL**

EMERGING STANDARDS

VECTOR WFS 3.0

WFS3 Core Conformance Checklist

Derived from the [WFS3 spec](#) as of 2018-03-15.

- (recommended) checkboxes aren't strictly necessary for conformance
- (optional) checkboxes have value but may be ignored without problem

7.2 API landing page

- ☐ GET request at / served
- ☐ Response content is based on [root.yaml](#) and minimally includes links to:
 - ☐ /api
 - ☐ /conformance
 - ☐ /collections

7.3 API Definition

- ☐ GET request at /api served
- ☐ Response content is the api definition document
- ☐ (recommended) Response content is OpenAPI format
 - If multiple formats are provided, use content negotiation

7.4 Declaration of conformance classes

- ☐ GET request at /conformance served
- ☐ Resonse content is based on OpenAPI schema [req-classes.yaml](#).
 - ☐ conformsTo in response contains
 - ☐ <http://www.opengis.net/spec/wfs-1/3.0/req/core>
 - ☐ (recommended) <http://www.opengis.net/spec/wfs-1/3.0/req/html>
 - ☐ (recommended) <http://www.opengis.net/spec/wfs-1/3.0/req/geojson>

7.5 HTTP 1.1

- ☐ Conforms to [HTTP 1.1](#), including correct use of status codes, headers, etc.
- ☐ (recommended) Supports [entity tags](#)

7.7 Support for cross-origin requests

- ☐ (recommended) If the server will be accessed from the browser, allow cross-origin requests.

IETF RFC 8142

GEOJSON

GeoJSON Text Sequences

describes the GeoJSON text sequence format for the "geo+json-seq" media type. This format is used to represent JSON text sequences and is particularly useful for very large geographic datasets incrementally. It defines the form of GeoJSON texts within

ASYNCHRONOUS I/O SANIC

Hello World Example

```
from sanic import Sanic
from sanic.response import json

app = Sanic()

@app.route('/')
async def test(request):
    return json({'hello': 'world'})

if __name__ == '__main__':
    app.run(host='0.0.0.0', port=8000)
```

Installation

- `pip install sanic`
